## LIQUIDITY COVERAGE RATIO – March 2018

### LCR Qualitative Disclosure:

The LCR standard aims to ensure that a bank maintains an adequate level of unencumbered HQLAs that can be converted into cash to meet its liquidity needs for a 30 calendar day time horizon under a significantly severe liquidity stress scenario.

#### a. Main drivers of LCR

LCR has two components:

- (i) The value of the stock of high-quality liquid assets (HQLA) in stressed conditions
- (ii) Total net cash outflows: The term "Total net cash outflows" is defined as "Total expected cash outflows" minus "Total expected cash inflows" in the specified stress scenario for the subsequent 30 calendar days (the stressed period).

LCR = Stock of High Quality Liquid Assets/Total Net Cash Outflows over the next 30 calendar days  $\geq 100\%$

RBI introduced LCR in a phased manner starting with a minimum of 60% w.e.f January 1, 2015 and to be maintained at minimum 100% from January 1, 2019.

#### b. Intraday movements of LCR

The movement of monthly LCR for FY 2017-18 is as follows:
